garhwalmansi@yahoo.in
Indore, Madhya Pradesh

I am a 27-year-old architect with a strong foundation in residential architecture and project management, currently involved in a variety of housing and interior design projects. Although interiors haven't been my primary focus, my experience in this area has enhanced my adaptability, attention to detail, and appreciation for spatial design. I regularly collaborate with Principal and Senior architects while also leading Juniors and independently managing projects. With a structured, efficient approach, I enjoy navigating complex workflows and utilizing design software to shape and communicate my ideas effectively. I thrive in collaborative environments, value healthy professional relationships, and am now seeking to immerse myself in high-end architectural projects that will challenge and expand my creative scope.
